XM FOR

Customer Experience

IndiGo

Optimizing digital channels is full of challenges

Siloed data sets, low data quality, and multi-channel journeys are making it harder than ever to get a **quick, clear picture of the digital experience** that can be actioned on.

Challenging to strike a balance between **driving down cost** to serve via automation / self-serve and **delivering a world-class customer experience.**

Increasingly difficult to **drive focused and productive digital usage and adoption** as digital channels, features, and technologies continue to explode.

Prioritizing digital roadmaps and resource focus can be a challenge amongst a sea of internal opinions and data points on where to focus efforts.

qualtrics XM

Outcomes for digital leaders today

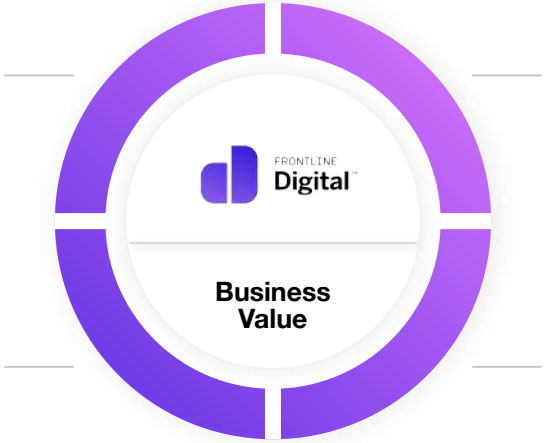
We have found that individuals like you are often focused on outcomes like the following.
We would like to understand which metrics you prioritize and how you think about them.

Customer Retention

+ Decrease Customer Churn Rate
+ Increase Customer Lifetime Value

Customer Acquisition

+ Increase Conversion Rate
+ Decrease Cart Abandonment Rate



Cost to Serve Customers

+ Increase Self Service Adoption
+ Decrease Repeat Contacts

Customer Spend

+ Increase Average Order Size

qualtrics XM

WHAT WE'RE SEEING:

How Voice of Customer programs are evolving to Operationalized Experience Management

	FROM	TO
CONTINUOUSLY LEARN	**STATIC SURVEYING & ANALYTICS** Deploy a consistent set of surveys that treats all respondents as one in the same - monitor surface level web analytics.	**DYNAMIC INSTRUMENTATION** Adjust structured and unstructured listening posts and sampling strategy to satisfy a changing set of insight needs.
PROPAGATE INSIGHTS	**REPETITIVE REPORTING** Produce standard measurements and metrics through reports and dashboards.	**ACTIONABLE INTELLIGENCE** Provide highly tailored insights that are delivered through various push & pull mechanisms.
RAPIDLY ADAPT	**PERIODIC IMPROVEMENTS** Make ad-hoc changes based on using insights to create a business case.	**ADAPTIVE PROCESSES** Drive ongoing adjustments from insights embedded w/in the normal flow of day-to-day operations.
CONNECT THE CUSTOMER JOURNEY	**SILOED EFFORTS** Digital CX program works on discrete projects to address individual aspects of digital experiences.	**ORGANIZATIONAL DISCIPLINE** Digital CX is one element of a cohesive organization-wide focus on improving the experiences it delivers.

The solution requires a modern approach to accessing & leveraging customer experience data

LISTEN → **ANALYZE & CONTEXTUALIZE** → **ACT**

Direct feedback
What the customer & employees said when we asked for feedback

Indirect feedback
What we learn from the customer and employees via their conversations with us

Inferred feedback
What we learn about a customer and employees their digital behaviors

Existing data
What relevant customer and employees data we have already collected

Customer memory
AI & Natural Language Understanding & Dynamic Segmentation

INTELLIGENT ROUTING

Customer improvement (1:1)
- Real-time intervention & recovery across digital & on-property experiences
- Personalizing Every Customer's Experience
- Automated Coaching/Training Customer Services

Business improvement (1:Many)
- Automatically generated focus areas & democratized insights
- Action planning & accountability
- Real-time journey orchestration & personalization

LEVERAGING AN AI POWERED PLATFORM – NLP, LLM, GEN AI

Qualtrics has helped customers capitalize on the increased importance of digital

Frontline Digital

Increasing digital revenue

- Holistic view of the digital customer journey
- Identify impactful moments that matter
- Reduce errors & friction to increase digital conversion & revenue

Frontline Digital

Closing digital experience gaps

- Highlight & identify fixes around critical moments in digital journey
- UX improvements across devices and channels
- Improving products & services through customer feedback

Frontline Digital

Improve brand perception

- Digital Behavior Monitoring to identify highest impact areas
- Reduced digital friction points that lead to Support interactions
- Rescue customers in-the-moment

qualtrics XM

Qualtrics enables teams across the enterprise to create world-class digital experiences

XM FOR
Customer Experience

Why Qualtrics for Digital Experience Management

Easy implementation and maintenance

+ Reduce time to insight with a single, comprehensive tag for all of your digital program needs
+ Make changes on the fly with no need for IT support

Consolidated insights

+ Reduce data silos and drive action faster with quantified analytics of VoC and DXA insights, complete with unstructured, open-text analysis

One XM Platform that fits into your tech stack

+ Connect & optimize the complete multi-channel customer journey using XiD
+ Reduce overall XM spend & increase operational efficiency

Robust roadmap

+ $500M dedicated to AI investment over the next 4 years
+ Evaluated as top XM vendor in both vision & ability to execute by Gartner

qualtrics XM

Listen to customers where they're interacting with your brand the most

Deeply understand your digital customer experience

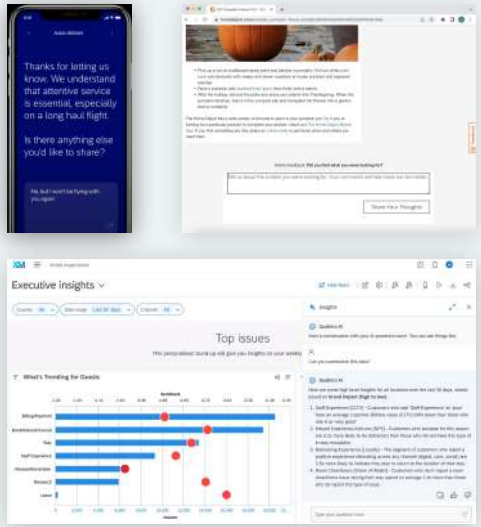
- Leverage best in class pre-built program methodology to gain a clear understanding of the your customer's digital experience.
- Utilize AI-driven conversational survey to dig deeper into the feedback your customers are providing.
- Make changes to your digital listening program without needing IT / managed service support.

Identify areas of digital friction & prioritize what to focus on first

- Launch digital intercepts for the right customer at the right time with intelligent targeting & real-time friction detection.
- Uncover unique, quantified insights by leveraging dashboards that combine quantitative & qualitative feedback data.

Close the loop quickly on poor digital experiences

- Automate triggers directly to customer service / technical support teams to fix broken experiences



qualtrics XM

Give voice to the ‘silent majority’ & uncover issues quickly

Quickly identify & root cause errors / friction points

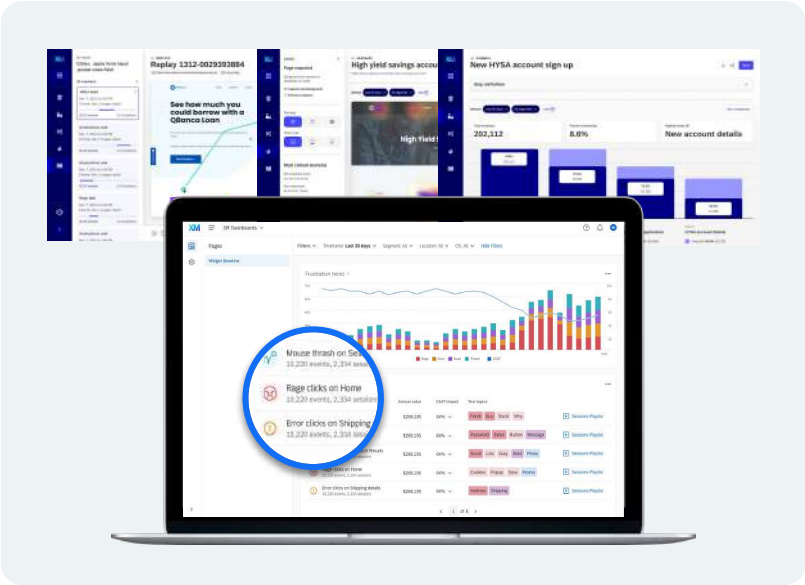
- Leverage digital behavior tracking to identify moments when customers are experiencing friction (eg. rage click, mouse thrash).
- Quantify what these friction points are costing your business with Funnels, Heatmaps, & Path Analytics.

Visualize the exact customer experience

- Session replay allows your teams to play back what the customer actually experienced during the session.
- Move seamlessly from survey responses to the session replay associated with that response.

Keep customer privacy first

- Leverage PII masking & GDPR compliance capabilities to ensure your customers are protected.



qualtrics XM

Tap into customer conversations across channels to identify digital opportunities

Uncover issues you may miss in your digital data

- Ingest and analyze native app reviews to uncover what's driving low score reviews.
- Listen to customer services calls & chat to identify friction points within your digital channels.

Identify unmet needs and innovate within your digital channels

- Uncover trending topics in service channels to identify what your customers are looking for in digital channels.
- Connect your digital channel data with the entire customer journey to unearth innovative insights.

Companies rely on Qualtrics to deliver business value

CUSTOMER CHALLENGE

Sprint's digital sales had an **average cart abandonment rate of 58%** across current and prospective clients. If cart value conservatively is $50 per client, Sprint was **losing an estimated $33M annually** from digital sales based on abandoned transactions alone.

The operational data that Sprint was collecting through traditional web analytics tools **wasn't providing clear direction** on why customers were abandoning.

HOW QUALTRICS HELPED

The VoC team implemented **in the moment digital intercepts** along the digital journey and during cart abandonment.

By **combining the experience data with the existing operational data** Sprint utilized Qualtrics PredictiQ to identify behaviors that predicted with **nearly 100% accuracy** when a customer would abandon a cart. Operational data alone only predicted with 72% accuracy.

VALUE ACHIEVED

Applying the model to future customers and digital properties Sprint is able to identify in real-time customers who are likely to abandon their cart and provide support to encourage conversion.

Utilizing this process Sprint **decreased cart abandonment from 58% to 36% - which correlates to $7.2M in additional digital revenue.**

BUSINESS IMPACT

"Qualtrics helps us predict exactly what we need to do to help customers complete their purchases. Those insights are literally worth millions..."

MABEL ACOSTA_
Web Analytics Program Manager

Companies rely on Qualtrics to deliver business value

CUSTOMER CHALLENGE

Abercrombie & Fitch were trying to solve how to focus the entire company and brand on the customer. They needed to **collect and analyze omni-channel data in order to build a complete picture of the customer journey.**

Specifically in digital, Abercrombie & Fitch was seeing **high CSAT scores but static / decreasing conversion rates** that were trailing ecommerce industry averages. They didn't know what needed to change to improve website conversion / revenue.

HOW QUALTRICS HELPED

The VoC team employed Qualtrics' Customer Experience Suite to understand and act on feedback at key points in the customer journey. Qualtrics **empowered teams to work cross-functionally on customer-focused business decisions.**

Specifically in digital, the team deployed **intercepts throughout the digital journey** - not just at post-checkout as has been the case previously. Combining the **in-journey feedback with session replay** Abercrombie & Fitch began identifying friction points they hadn't seen before.

VALUE ACHIEVED

By listening throughout the customer journey to both feedback and behavioral signals Abercrombie & Fitch **identified & prioritized 9 core fixes** to their ecommerce channel.

The digital team implemented these fixes in a quick sprint and the ecommerce channel saw a **$1M+ spike in revenue attributed to these fixes in the following month.**

BUSINESS IMPACT

"We learn a lot about what customers' pain points are and what their needs are, and then our teams are acting on it as fast as they can."

TOM BURNETT_
VoC Manager

Abercrombie & Fitch

Companies rely on Qualtrics to deliver business value

CUSTOMER CHALLENGE

From their annual surveys, Grundfos saw that what made customers unhappy was not giant CX disasters - instead, it was **small, disappointing interactions with the company, at various moments along the customer journey.**

However, with 600k customers around the world and more than 145k touchpoints per day it was an **enormous undertaking to measure performance at every level from sales visits to website visits.**

HOW QUALTRICS HELPED

With Qualtrics, Grundfos was able to **get feedback quickly and know right away when things had gone wrong within its digital channels - and the reason why.**

By measuring feedback at every touchpoint, Grundofs was able to follow up with unhappy customers. Using **Qualtrics actioning platform**, one of Grundfos' sales team members is notified whenever a customer gives bad feedback on any aspect of the customer experience.

Grundfos was able to kick off its **CX program with a team of 1, thanks to Qualtrics self-service platform.**

VALUE ACHIEVED

By listening and acting on digital feedback, Grundfos was able to **improve its average rating across all touchpoints by 9 points.**

They found that they **achieved a 3x larger growth rate** with happy customers vs unhappy ones.

BUSINESS IMPACT

"We had a customer tell us they couldn't find product information on our website. Within hours, one of our sales team had contacted them and solved their issue. And we actually turned that interaction into a sale for a big tunnelling project."

qualtrics XM

Companies rely on Qualtrics to deliver business value

CUSTOMER CHALLENGE

As part of their efforts to provide an **improved resident experience**, the City of Corona is going through a digital transformation but didn't have a way to **quickly identify and fix problems with digital processes on the website**, unless customers submitted a formal complaint. This left many frustrating digital experiences unnoticed and unresolved.

HOW QUALTRICS HELPED

The City of Corona used insights from Qualtrics Digital Experience Analytics to **shape the new website rollout**, ensuring that it meets the needs of their residents.

They also **identified and fixed problems**, like a broken drop-down menu where many residents were getting stuck, and addressed experience gaps in online processes, like the process to apply for a permit.

Issues were found with Digital Experience Analytics, **which would have otherwise been missed.**

VALUE ACHIEVED

By accessing and monitoring behavioral data the city was able to quantify insights with rage click tracking and session replay.

They also **increased agility to quickly close experience gaps**.

BUSINESS IMPACT

"For a long time, we were acting on gut feeling, but now we have real data that gives us insights at various touch points within the digital experience we didn't have before."

AI is foundational to our XM Platform

Qualtrics & AI

Qualtrics' data gives us over a **decade's worth** of **diverse, real-world interactions** - an extensive dataset that drives our AI engine.

AI models trained on billions of inputs - conversations, surveys, profiles and workflows

Team of 60+ AI-enabled scientists and engineers, with $500M+ of R&D efforts

Security, privacy, and data protection are core priorities

AI Impact on XM

AI is having a **profound impact on Experience Management** and leaders across the industry expect it enable significant incremental impact.

85% of experience data is now coming from **unstructured sources and can only be effectively leveraged with AI**

58% of leaders believe customers value the **level of service and personalization AI offers**

61% of leaders believe integrating AI into customer experiences will **provide a competitive advantage**

Navigating AI Journey

Our strategy for AI is to **meet you at your spectrum of need. Qualtrics can be an effective partner** wherever you are on your AI journey.

AI Spectrum of Need

Full Control. Full user control; no AI influence on configuration

Advisory. User control on system output; AI-driven guidance on configurations

Autopilot. AI system makes most decisions but user can override

Full Autonomy. Fully AI driven system; no user overrides or controls

Qualtrics' Full AI Perspective
