

**Background:**

Qualtrics' security preferences do not permit the upload of our security documentation to customer systems or 3rd party portals. The distribution is controlled and monitored via our Security team and approved tooling. The more sensitive artifacts require NDA commitments to be in place, either via an active contract (Customers) or separately (Non-Customers). Our employees are not authorised to share such documentation outside of the authorized route. Qualtrics' security, compliance and AI documentation is available via our Trust Center: <https://www.qualtrics.com/trust-center/>.

If you require any further assistance, please reach out to your usual Qualtrics relationship owner or Customer Support.

**Introduction to Qualtrics:**

Please see our Cloud Security and Privacy Framework for a detailed overview of all security policies and standards in place, as well as our industry standard certifications for evidence of controls in place. All of Qualtrics' security documentation can be requested from the Qualtrics Trust Center: <https://www.qualtrics.com/trust-center/>.

---

**Our Industry Recognized Certifications & Security Profile:**

We do not release internal policies, metrics or details on the tools, software and configurations in use internally beyond the detail that is included in our customer facing Cloud Security & Privacy Framework. The Cloud Security & Privacy Framework details our platform, its features, and our security posture, along with various globally recognized, industry high standard security certifications. Topics and related controls are independently attested to by qualified auditors.

The list below is not exhaustive but items available in the Qualtrics Trust Center include:

**Qualtrics XM Platform:**

- + Application, Mobile, and External Network pen tests
- + FedRAMP High (only applicable to our Gov1 data center and eligible customers)
- + HITRUST
- + ISO 27001/17/18
- + ISO 27701
- + ISO 42001
- + ISO 9001
- + SOC 2 Type 2
- + SIG & CAIQ

**Data Center:**

- + AWS – Leveraged globally and has various certifications in place, which may vary by site. Qualtrics is not authorized to distribute these documents. Customers can refer to AWS' own AWS Compliance (<https://aws.amazon.com/compliance/>) and AWS Artifact (<https://aws.amazon.com/artifact/getting-started/>) resources, for what AWS makes available.

*\*The listing provided is an overview, see <https://www.qualtrics.com/trust-center/> for our full suite of documentation.*

**Our Optional AI Feature Offerings**

Qualtrics is a self service SaaS with optional AI features. Data involved, usage and use case(s) therein are customer determined.

Please see the "Spotlight On: Qualtrics' Commitment to Secure and Private AI" announcement on our Trust Center for Qualtrics' AI resources: <https://www.qualtrics.com/trust-center/>. This includes ISO 42001 certification, AI admin support page(s) and feature specific guidebooks, and more.
