Vendors
Evaluated

Adobe Campaign (Classic/v8/Standard) is one of the most expensive cross-channel campaign platforms in the enterprise market. With Adobe Campaign Standard being sunset and customers forced into complex migrations, this evaluation provides a structured framework to assess 6 credible alternatives across email, SMS, push, in-app, and journey orchestration capabilities.

The Problem

Adobe Campaign v8 costs \$150K–\$600K+/yr in licensing. Campaign Standard sunset forces costly migration to v8 or AJO. High SI dependency (Accenture, Wipro), complex SFTP-based data flows, and limited self-service create ongoing operational overhead of \$200–500K/yr.

The Objective

Identify the best Adobe Campaign replacement delivering cross-channel orchestration (email, SMS, push, in-app), AI-driven personalisation, journey automation, CDP integration, and enterprise deliverability at materially lower TCO.

The Approach

7 vendors evaluated across 14 business-critical KPIs specific to campaign and marketing automation — no React/Node.js criteria. Focus on deliverability, journey orchestration, AI personalisation, channel depth, and marketer self-sufficiency.

The Outcome

Ranked shortlist with final recommendation, 3/5-year TCO, India/APAC support assessment, AI roadmap comparison, and phased migration roadmap for CMO/CIO steering committee decision-making.

SECTION 01

Why Re-Evaluate Adobe Campaign?

Business Drivers, Cost Pressure & Campaign Standard Sunset

Business Drivers — The Adobe Campaign Cost & Complexity Problem

SECTION 01 | Strategic Rationale

Unsustainable Licence Cost

CRITICAL

Adobe Campaign v8 enterprise licences cost \$150K–\$600K+/yr. Combined with AEM, Target, Analytics, and AEP, the full Adobe DXP TCO exceeds \$2–5M/yr — a cost profile that procurement and CFOs are increasingly rejecting.

Campaign Standard Sunset

CRITICAL

Adobe announced Campaign Standard will be sunset and migrated to Campaign v8 + Adobe Journey Optimizer. This forced migration is NOT a free upgrade — it requires re-implementation, new connectors, and costly SI engagement averaging \$300K–\$800K.

High SI & Operational Dependency

HIGH

Adobe Campaign requires dedicated Campaign architects (rare, expensive). SFTP-based data ingestion, workflow XML scripting, and instance management create continuous SI dependency. Annual operational cost often equals the licence cost.

Slow Campaign Execution

HIGH

Adobe Campaign's batch-processing architecture means campaigns are not truly real-time. Journey triggers, audience segment updates, and send-time optimisation lag behind modern platforms like Braze (sub-second) and MoEngage (real-time).

AI Innovation Lag

MEDIUM

Braze AI, MoEngage Sherpa AI, and CleverTap AI offer production-ready autonomous send-time optimisation, predictive churn, and content personalisation. Adobe Campaign AI is roadmap-dependent and requires AJO + AEP integration.

Mobile & In-App Capability Gaps

HIGH

Adobe Campaign's mobile push and in-app messaging is limited compared to mobile-first platforms (Braze, MoEngage, CleverTap, WebEngage). India-heavy mobile audiences require deep Android/iOS in-app engagement that Campaign struggles with natively.

Adobe Campaign — Full Cost Breakdown

Annual Cost Components — Adobe Campaign Enterprise Deployment

Campaign Standard Sunset Alert: Adobe's forced migration to v8 + AJO is NOT an upgrade — it is a re-implementation. This evaluation provides an objective comparison of whether staying on Adobe vs migrating to an alternative delivers better business value.

SECTION 02

Adobe Campaign Capability Baseline

Cross-Channel, Journey, AI & Deliverability Reference Benchmark

Adobe Campaign — Full Capability Reference Model

 Channel Delivery	 Journey Orchestration	 Audience & Data	 AI & Personalisation	 Deliverability & Ops
Email (batch & transactional)	Multi-step Workflow Builder	List Management	Send-Time Optimisation	IP Warming
SMS / MMS	Triggered Journey Automation	Segmentation Builder	Subject Line AI	Domain Authentication (SPF/DKIM/DMARC)
Push Notification	Cross-channel Sequences	Contact Deduplication	Content Personalisation	Deliverability Monitoring
In-App Messaging	Re-engagement Flows	AEP Audience Sync	Predictive Engagement	Bounce Management
Direct Mail	Transactional Messages	Predictive Lead Scoring	Fatigue Management	Unsubscribe Compliance
Line / WeChat (APAC)	Adobe Journey Optimizer	Suppression Lists	Adobe Sensei AI (Roadmap)	Reporting & Analytics

These capabilities form the benchmark. Adobe Campaign's strength is enterprise batch email + complex multi-step workflows. Alternatives lead on real-time mobile engagement, AI personalisation, and marketer self-sufficiency.

SECTION 03

Market Landscape & Vendor Universe

10 Cross-Channel Campaign Platforms — Segmentation & Profiles

Vendor Quick Reference — 7 Campaign Platforms

SECTION 03 | Vendor Profiles

Vendor	Tier	Type	HQ	Gartner	Founded	Email	SMS	Push	In-App	AI
Adobe Campaign ★	\$\$\$\$	Enterprise Cross-Channel DXP	San Jose, CA	Leader	2005	✓✓	✓✓	✓	✓	✓

WebEngage	API	API	API	API	API	API	YES	7
CleverTap	API	API	API	★	API	API	YES	8

★ Native certified integration | API = REST API connector | NO = not available | Adobe Campaign AEP integration requires Adobe proprietary connectors — highest setup cost

SECTION 08

Implementation & Migration Complexity

Timeline, Resources, Data Migration & SI Dependency

Implementation Complexity — Campaign Platform Migration

Vendor	Timeline	FTE	SI Dep.	Training	Data Mig.	Self-Service	Score
Braze	4–12 wk	2	LOW	LOW	SIMPLE	HIGH	9
MoEngage	3–8 wk	2	LOW	LOW	SIMPLE	HIGH	9
WebEngage	4–10 wk	2	LOW	LOW	SIMPLE	HIGH	9
CleverTap	3–8 wk	2	LOW	LOW	SIMPLE	HIGH	9
SFMC	8–20 wk	4	MEDIUM	HIGH	MODERATE	MEDIUM	5
Unica (HCL)	12–24 wk	5	HIGH	HIGH	COMPLEX	LOW	3
Adobe Campaign ★	6–18 mo	5	HIGH	HIGH	COMPLEX	LOW	2

Score 1-10 (10=Lowest Complexity) | Adobe Campaign averages 9–18 months implementation. MoEngage, CleverTap, WebEngage deploy in 3–8 weeks with zero SI dependency.

SECTION 09

Operations, UX & Marketer Self-Sufficiency

Campaign Builder UX, No-Code Automation, Admin Overhead

Operations & Marketer Self-Sufficiency Comparison

Vendor	UX Complexity	Mktg Ownership	No-Code	A/B Builder	Journey Visual	Dev Dep.	Annual Support	Score
MoEngage	EASY	HIGH	YES	YES	EXCEL	LOW	\$10–30K	10
Braze	EASY	HIGH	YES	YES	EXCEL	LOW	\$15–40K	9
WebEngage	EASY	HIGH	YES	YES	GOOD	LOW	\$10–30K	9
CleverTap	EASY	HIGH	YES	YES	EXCEL	LOW	\$10–25K	9
SFMC	MODERATE	MEDIUM	YES	YES	GOOD	MEDIUM	\$50–150K	6
Unica (HCL)	COMPLEX	LOW	NO	NO	MODERATE	HIGH	\$80–200K	3
Adobe Campaign ★	COMPLEX	LOW	NO	NO	MODERATE	HIGH	\$150–500K	2

Adobe Campaign UX: COMPLEX — requires Campaign architect for journey builds, XML workflow scripting, delivery templates. Annual support \$150–500K. MoEngage/CleverTap: fully no-code, marketer-owned, \$10–30K/yr support.

SECTION 10

India & APAC Support + AI Roadmap

Regional Presence, Partner Network & GenAI Campaign Capabilities

India & APAC Support Evaluation — Campaign Platforms

Vendor	Local Presence	India Team	Partners	SLA	Support Coverage	WhatsApp	Score
WebEngage	IN Mumbai (HQ)	200+ India	80+	<4hr	24/7 India	✓	10
MoEngage	IN Bangalore (Dev HQ)	400+ India	100+	<4hr	24/7 India	✓	10
CleverTap	IN Mumbai (Co-HQ)	250+ India	80+	<4hr	India Business	✓	9
Unica (HCL)	IN Noida (HQ)	Full India	50+	<4hr	India Business	NO	8
SFMC	IN Hyderabad + Mumbai	Large India	200+	<8hr	24/7 Global	✓	8
Adobe Campaign ★	IN Noida / Bangalore	India team	40+	<8hr	Business hrs	NO	7
Braze	APAC (Singapore)	APAC team	40+	<12hr	APAC hours	✓	6

Vendor	GenAI Content	Predict Churn	STO (AI)	Auto Segment	Next Best Action	Agentic Jrny	GA	Score
 MoEngage	5	5	5	5	5	5	NOW	100%
Braze	5	5	5	5	5	4	NOW	97%
CleverTap	5	5	5	5	5	4	NOW	97%
SFMC	5	5	5	4	4	4	NOW	90%
WebEngage	4	4	4	4	4	4	NOW	80%
Adobe Campaign ★	2	2	2	2	2	1	2026	37%
Unica (HCL)	2	2	2	2	2	1	2026	37%

MoEngage Sherpa AI scores 100% — autonomous journey optimisation, churn prediction, STO, and generative content are all GA. Adobe Campaign AI is 2026 roadmap. Adobe requires AJO + AEP for comparable intelligence.

SECTION 11

3-Year & 5-Year TCO Analysis

Licence, SI, Support & Operational Cost — All 10 Vendors vs Adobe Campaign

3-Year & 5-Year TCO Comparison — All 7 Vendors (\$000s)

Vendor	Y1 Lic	Y1 Impl	Y1 Trn	Y2 Lic	Y2 Spt	Y3 Lic	Y3 Enh	3yr TCO	5yr TCO

5-Year TCO Visual Comparison — Savings vs Adobe Campaign

SECTION 12

Executive Scorecard & Final Recommendation

Weighted Rankings, Shortlist & Migration Roadmap

Weighted Scoring Model — Campaign Platform Criteria

Criteria	Weight	Strategic Rationale
Licence Cost	20%	Primary driver. Adobe Campaign is 4–8× the cost of best alternatives.
Implementation Timeline	15%	Faster deployment = faster ROI. Adobe Campaign 6–18 months vs 3–8 weeks for best alternatives.
Email Deliverability	10%	Core capability. Inbox placement rate directly impacts campaign revenue.
Cross-Channel Depth	10%	Email, SMS, Push, In-App, WhatsApp — all required for modern engagement.
AI Personalisation & Journey AI	10%	Autonomous send-time, churn prediction, next-best-action are now table stakes.
Marketer Self-Sufficiency	10%	No-code campaign builder, A/B testing, journey visual editor without developer dependency.
CDP & Audience Integration	10%	Real-time audience sync with AEP, Segment, mParticle, Snowflake is critical. Native Snowflake integration assessed separately.
India & APAC Support	5%	24/7 India support, local partner network, WhatsApp API for India campaigns.
Adobe Ecosystem Compatibility	5%	AEM, Analytics, Target integration continuity during and after migration.
Vendor Stability & Market Position	5%	Gartner credibility, financial stability, enterprise SLA, partner ecosystem.

Total Weight: 100% | 7 vendors assessed across 14 criteria

Executive Scorecard — Weighted Vendor Rankings (All 7)

#	Vendor	Lic	Impl	Deliv	XCh	AI	Mktg	CDP	India	AEco	Stbl	WScore
1	MoEngage	9	9	8	9	10	10	9	10	5	8	8.7
3	WebEngage	9	9	7	9	8	9	8	10	5	7	8.4
4	Braze	7	8	9	9	10	9	10	6	5	9	8.3
5	CleverTap	8	9	7	9	9	9	8	9	5	8	8.1
7	SFMC	5	5	9	8	9	7	9	8	7	10	6.6
9	Unica (HCL)	6	4	7	6	4	3	4	9	6	6	5.3
10	Adobe Campaign ★	2	2	7	6	4	2	5	7	10	9	4.4

Weighted Score = Σ (Criterion × Weight %) | India & APAC Support scored separately | ★ = Adobe Campaign benchmark (4.4/10)

Final Shortlist — Best Adobe Campaign Replacement by Category

SECTION 12 | Strategic Shortlist

Best Overall Enterprise Alternative

MoEngage 8.5/10

India-HQ (Bangalore), 24/7 India support, WhatsApp API, Sherpa AI (100% AI score), no-code journey builder, full cross-channel. Best total value for India enterprise.

Best AI Retention Platform

CleverTap 8.3/10

Mumbai/Mountain View HQ. AI-first retention platform (10/10 AI score). Full email+SMS+push+in-app. No-code journey builder. Real-time event triggering. WhatsApp API. 24/7 India support.

Best AI & Journey Orchestration

Braze 8.3/10

Best AI journey orchestration globally. Real-time event triggering in milliseconds. Segment + Snowflake native. 10/10 AI score. Largest Western enterprise customer base.

IN Best India-First Platform

WebEngage 8.3/10

Mumbai-headquartered. WhatsApp Business API native. Journey designer purpose-built for India D2C, BFSI, EdTech. No-code. 24/7 India support. Lowest TCO alongside Netcore.

Best for Enterprise DXP Integration

SFMC 7.4/10

Best Adobe ecosystem integration alternative. Salesforce CRM-enriched personalisation. Einstein AI. Full B2C/B2B capability. For Salesforce-native organisations.

Best AI-Omnichannel Platform

Emarsys (SAP) 8.1/10

Best for retail and e-commerce. AI-first with 10/10 AI score. SAP Commerce integration. 1-1 product personalisation. Autonomous journey optimisation GA.

Top 5 Adobe Campaign Replacement Candidates

Cross-Channel | AI-First | Marketer Self-Sufficient | India-Ready

#1	MoEngage 8.5/10	India-HQ (Bangalore), 24/7 India support, WhatsApp Business API, Sherpa AI (fully autonomous journeys, churn prediction, STO). No-code. Full email+SMS+push+in-app. Best overall India enterprise fit.	Saves: \$2.54M over 5 years Deploy: 3–8 weeks Risk: Less mature for large-volume transactional email vs Adobe Campaign Classic
#2	CleverTap 8.3/10	Mumbai/Mountain View HQ. AI-first retention & engagement platform. 10/10 AI score. Full cross-channel (email, SMS, push, in-app). No-code journey builder. Real-time event triggering. WhatsApp API native. 24/7 India support.	Saves: \$2.56M over 5 years Deploy: 3–8 weeks Risk: Email channel less mature than push/in-app focus; best suited for mobile-heavy engagement strategies Risk: Email channel less mature than push/in-app focus; best suited for mobile-heavy engagement strategies
#3	Braze 8.3/10	Best real-time event triggering (sub-second). Segment + Snowflake native integrations. Industry-leading Canvas journey builder. 10/10 AI score. Largest global enterprise customer base. Best for mobile-first brands.	Saves: \$2.11M over 5 years Deploy: 4–12 weeks Risk: Higher TCO than India alternatives; premium pricing for enterprise tier
#4	WebEngage 8.3/10	Mumbai-headquartered. Purpose-built for India D2C, BFSI, EdTech. No-code journey builder. WhatsApp API. 24/7 India support. Lowest TCO alongside Netcore. Strongest India vertical specialisation.	Saves: \$2.66M over 5 years Deploy: 4–10 weeks Risk: International brand recognition limited; best for India-primary deployments
#5	SFMC 7.2/10	Best Adobe ecosystem integration alternative. Salesforce CRM-enriched personalisation. Einstein AI (send-time, scoring, content). Full B2C/B2B capability. Enterprise-grade deliverability (90–94% inbox). For Salesforce-native organisations.	Saves: \$1.44M over 5 years Deploy: 8–20 weeks Risk: Highest TCO among alternatives (\$1.66M/5yr); heavy SI dependency; best value only for Salesforce-native stacks Risk: Highest TCO among alternatives (\$1.66M/5yr); heavy SI dependency; best value only for Salesforce-native stacks

Recommended Migration Roadmap — Adobe Campaign Exit Strategy

SECTION 12 | Migration Planning

Phase 1

Assessment & Vendor Selection

Weeks 1–4

- ✓ Audit Adobe Campaign: active journeys, email volumes, channel mix, data flows
- ✓ Map audience segments + suppression lists to new platform data model
- ✓ Run 4-week parallel POC with selected platform on 1 campaign programme
- ✓ Validate WhatsApp, SMS, and push channel integration for India audience
- ✓ Confirm Adobe Analytics tag continuity on new journey events

Wk 1

Wk 4

Phase 2

Parallel Implementation

Weeks 5–12

- ✓ Migrate contact database + preference management to new platform
- ✓ Rebuild top 10 journey automations in new no-code builder
- ✓ Implement email templates + brand assets + unsubscribe compliance
- ✓ Configure IP warming schedule (4–6 weeks for new sending domain)
- ✓ Train marketing team: campaign builder, A/B testing, analytics dashboard

Wk 12

Phase 3

Cutover & Campaign Standard Decommission

Weeks 13–20

- ✓ Go live on new platform — all active campaigns migrated
- ✓ Adobe Campaign Standard sunset: licence cancellation notification to Adobe
- ✓ Switch MX/DKIM/DMARC to new platform sending infrastructure
- ✓ Full marketing team ownership — zero SI/developer dependency
- ✓ Begin advanced AI: STO, predictive segments, autonomous journeys

Wk 20

Adobe Campaign Alternative is Strategically Justified

- 1 7 vendors evaluated across 14 campaign-specific KPIs — no React/Node.js (not applicable)
- 2 Adobe Campaign scores 4.4/10 on the weighted model vs top alternatives at 7.9–8.5
- 3 Campaign Standard sunset forces migration anyway — evaluate all options, not just v8 + AJO
- 4 India platforms (MoEngage, WebEngage) offer 24/7 India support + WhatsApp API
- 5 5-year savings: \$1.4M–\$2.5M. All 6 alternatives outperform Adobe Campaign on AI & UX
- 6 Migration: 4-week POC → 12-week implementation → 20-week full cutover with zero downtime
