

**Commercial Proposal for Customer Identity Resolution &
Unified Data Platform
By Binario Technologies Private Limited**

Date of Proposal: 23 May, 2026

1. Commercial

Based on the scope of work defined in the revised RFP, below are the commercials for implementation, infrastructure, support, and associated services for the Customer Identity Resolution & Unified Data Platform initiative.

The proposed commercial model assumes maximum utilization of IndiGo's existing enterprise platforms, infrastructure landscape, and governance ecosystem wherever applicable.

S. No.	Header	Cost INR	Mandatory / Optional
1	License Subscription Cost	Provided by IndiGo	Mandatory
2	Implementation Cost (One Time)	████████	Mandatory
3	Infrastructure Cost – Development Environment	Provided by IndiGo	Optional
4	Infrastructure Cost – UAT / Pre-Prod Environment	Provided by IndiGo	Optional
5	Infrastructure Cost – Production Environment	Provided by IndiGo	Optional
6	Managed Support Cost Yearly (Post Warranty)	████████	Optional
7	Warranty Support Cost	0	Mandatory
8	Any Other Cost (T&M / Additional Resources etc.)		Optional

S. No.	Header	Cost INR	Remark
1	License Subscription Cost - Prod	0	Infra would be provided by IndiGo
2	License Subscription Cost - Test / UAT	0	Infra would be provided by IndiGo
3	License Subscription Cost - Dev	0	Infra would be provided by IndiGo
4	Implementation Cost (One time)	████████	5 Milestones - Project Advance: 15% Requirement Sign Off: ██████ UAT Release: ██████ UAT Sign Off: ██████ Go-Live - ██████ Warranty Completion - ██████
5	Managed Support Cost for 12 months	████████	████████
6	Warranty Support	0	Covered as part of implementation cost during warranty period
7	Any other Cost (Eg T&M resource rates etc)	NA	

Commercial Notes

- Infrastructure sizing and environment planning are indicative and subject to finalization during implementation.
- Existing IndiGo enterprise environments and infrastructure components are expected to be leveraged as part of the proposed deployment approach.
- Any external hosting model, third-party platform dependency, or additional cloud/service component outside IndiGo's standard ecosystem shall be considered separately subject to architecture and approval review.
- Post stabilization support engagement, if required, can be jointly planned with IndiGo based on operational ownership preferences and support strategy.
- Change requests, scope changes, or additional implementation dependencies may impact timelines and commercials.

2. Terms & Conditions

- The engagement between IndiGo and Binario will be governed by mutually agreed contractual terms, ensuring clarity, transparency, and effective collaboration throughout the project lifecycle.
- Project execution will commence upon formal confirmation / Purchase Order (PO) or written approval from IndiGo.
- Applicable taxes and statutory charges will be levied as per prevailing regulations.
- The engagement will follow an offshore-first delivery model, unless otherwise agreed for specific requirements.
- The scope of work is based on the current understanding of requirements as outlined in the RFP and subsequent discussions.
- Both parties agree to treat all shared information as confidential and proprietary.
- Data shared for the purpose of implementation will be used strictly for project execution and handled in accordance with applicable data protection regulations (e.g., DPDP/GDPR as applicable).
- Both parties will collaborate proactively to resolve dependencies, infrastructure alignment requirements, and implementation risks.
- The implementation approach is expected to align with IndiGo's existing enterprise infrastructure, hosting standards, and internal governance practices.
- Any additional external platform, hosted component, or non-standard technology dependency proposed during implementation shall require prior review and approval from IndiGo.
- All deliverables developed specifically for IndiGo under this engagement will be treated as IndiGo's intellectual property, unless otherwise agreed. Pre-existing tools, accelerators, or frameworks used by Binario will remain Binario's intellectual property.
- Any post go-live operational support engagement shall be mutually planned based on the agreed support ownership and transition approach.
- Binario shall provide relevant documentation, operational handover support, and knowledge transfer assistance as part of the implementation and transition process.
- Neither party shall be liable for delays or failures caused due to factors beyond reasonable control (force majeure, third-party dependencies, etc.).
- Either party may terminate the engagement with prior written notice as per mutually agreed contract terms.
- In case of termination, all completed deliverables up to the termination date will be handed over to IndiGo and IndiGo will make payments for completed deliverables accordingly.
- Both IndiGo and Binario will maintain open communication, transparency, and alignment to ensure successful delivery of the solution.
