

Customer Identity Resolution Platform Proposal

Client: Indigo

Date: 26.05.2026

1. Commercial

The commercial structure is based on the defined scope of work and covers implementation of the customer identity resolution platform, integration activities, monitoring utility development, deployment, and stabilization support.

Final commercials will be mutually agreed based on scope confirmation, implementation timelines, infrastructure approach, hosting preferences, and resource requirements.

Commercial Engagement Structure

S. No.	Header	Cost	Mandatory / Optional
1	License Subscription Cost	Provided by IndiGo	Mandatory
2	Implementation Cost (One Time)	██████████	One crore, ten thousand rupees.
3	Infrastructure Cost – Development Environment	Provided by IndiGo	Optional
4	Infrastructure Cost – UAT / Pre-Prod Environment	Provided by IndiGo	Optional
5	Infrastructure Cost – Production Environment	Provided by IndiGo	Optional
6	Managed Support Cost (Post Warranty)	██████████	Optional
7	Warranty Support Cost	0	Mandatory
8	Any Other Cost (T&M / Additional Resources etc.)		Optional

Implementation Model:

The implementation will follow a fixed-cost approach covering the delivery lifecycle, including:

- Requirement understanding and planning
- Solution design and integration setup
- Identity reconciliation and synchronization implementation
- Monitoring utility development
- Testing and validation
- Deployment and go-live support
- Initial stabilization support

The pricing assumes delivery within the agreed scope and timelines.

Implementation Schedule:

Below is the cost of implementation and associated milestones

Milestone	Description	Percentage	Amount
Project Advance	Before the project kick off, Advance	████	██████████
Product Backlog Sign Off	Completion of requirement gathering, environment set up and creation of sign off	████	██████████
Epic 1	Data ingestion and transformation for setting up customer identity data and reconciliation workflows	████	██████████
Epic 2	Development of identity resolution and synchronization solution	████	██████████

Epic 3	Creation of customer 360, identity graph, and monitoring capabilities	██████████	██████████
Epic 4	Development of monitoring and manual identity resolution utility	██████████	██████████
Warranty	At completion of Warranty	██████████	██████████
One Year Managed Support	Advance	██████████	██████████
Total Cost	Implementation + Warranty + One Year Managed Support	INR: ██████████ ████████████████████ ████████████████████	██████████

Approach

The work will be delivered as a project engagement with coordination between Rostan and IndiGo teams.

- Rostan will handle execution and delivery
- IndiGo teams will support with inputs, validation, environment access, and approvals
- Deployment and implementation activities will align with IndiGo enterprise standards and governance requirements

2. Support Model

Post go-live support may be availed as a managed support engagement based on mutually agreed scope, tenure, SLAs, and commercials.

The support scope may include:

- Incident handling and issue resolution
- Application-level support
- Performance monitoring and tuning
- Data pipeline and integration support
- Security updates and fixes
- Documentation and transition support

Infrastructure operations, hosting management, OS administration, and enterprise security controls for IndiGo-managed environments are expected to remain under IndiGo or its designated infrastructure partners.

IndiGo may continue vendor-managed support, partially onboard internal teams, or transition operational ownership internally post stabilization.

Managed support services shall be commercialized separately as an optional service component.

3. Change Request Commercials

Any effort beyond the agreed scope shall be handled through a mutually agreed Change Request (CR) process and charged based on actual effort utilization.

Billing will be based on:

- Effort utilized
- Resource type
- Complexity and dependency assessment
- Required approvals and scope validation
- Blended Rate for execution of CR is [REDACTED] per Man Day

Terms & Conditions

The engagement will be governed by mutually agreed terms between Rostan Technologies Pvt. Ltd. and IndiGo.

Payment Terms: NET60 (60 Days from the date of invoice).

All the prices are excluding taxes.

Project execution will begin upon confirmation of the work order or formal agreement. The delivery will primarily follow an offshore model unless otherwise agreed.

All information exchanged during the engagement will be treated as confidential and will not be shared with any external party without prior written consent.

Any changes in scope, timelines, deliverables, hosting approach, or environment requirements may impact the project schedule and commercials. Such changes will be managed through a mutually agreed change request process.

The effort and cost estimates are based on the current understanding of requirements, integration dependencies, and infrastructure assumptions. Any changes may require revision of timelines and commercials.

Any vendor-hosted infrastructure, external SaaS/PaaS services, or third-party components, if required, shall be proposed separately and remain subject to IndiGo approvals.

Applicable taxes will be charged as per prevailing regulations.

Both parties will work collaboratively to ensure timely execution, knowledge transfer, transition support, and alignment with the agreed implementation plan.
