STANDARD TERMS & CONDITIONS.....	16

Executive Summary

This commercial proposal is aligned with the revised Technical Proposal submitted (Version 1.1) and outlines the corresponding commercial constructs for implementation, warranty support, optional managed services, and change management aligned to the revised IndiGo RFP requirements.

The proposed engagement is structured around a **fixed-cost implementation** model linked to clearly defined delivery milestones to ensure transparency, predictability, and outcome-driven execution. The proposed scope includes identity reconciliation, duplicate resolution, customer identity synchronization, and development of a monitoring and anomaly management utility across the existing IndiGo ecosystem.

The commercial structure has been organized to provide clear bifurcation between mandatory implementation services, optional infrastructure components, and optional managed support services. The proposal is also aligned with IndiGo's preference to leverage existing enterprise-managed infrastructure, platforms, and security controls wherever technically feasible.

Any **Change Requests (CRs)** beyond the agreed scope will be managed through a **Time & Material (T&M) model**, based on actual effort, providing flexibility to accommodate evolving requirements while maintaining commercial clarity and governance control.

1. Scope of Work

Based on discussions and clarifications received from the IndiGo team, the proposed scope of work includes customer identity reconciliation, synchronization, anomaly monitoring, and operational utility development across the existing IndiGo ecosystem.

The scope of work outlined below constitutes the final agreed scope and shall form an integral part of the technical proposal submitted.

- **Establish a single source of truth for customer identity and ensure consistent synchronization across:** Existing enterprise ecosystem applications and integration interfaces
 - CIAM
 - LMS (Bluechip)
 - Navitaire
 - **Data Cleansing Activities:** As per the revised RFP (RFP_Identity_resolution_revised_Scope_15May26), data cleansing has been included within the scope of work. This activity will be scoped specifically to customer entity data across three systems: CIAM, LMS, and Navitaire. Any further data cleansing is out of scope.
 - **One-Time Data Reconciliation & Identity Resolution:**
 - Extract customer data via APIs and integration interfaces across relevant systems
 - Identify mismatches including:
 - Duplicate identities
 - Missing mappings
 - Attribute inconsistencies (Gender, Name, Contact Details)
 - Implement deterministic and probabilistic identity resolution logic for customer matching and reconciliation
 - Build reconciliation workflows to:
 - Map identities across systems
 - Resolve duplicate profiles
 - Standardize customer attributes
 - Synchronize corrected records across connected systems
 - **Web-Based Monitoring & Synchronization Utility:**
 - Develop a centralized web-based utility/platform for continuous monitoring and administrative review of identity anomalies across systems
 - Process T-1 transactional and registration data for reconciliation validation and synchronization checks
- 1. New Registration Monitoring**
- Capture and validate customer registrations originating through CIAM
 - Validate synchronization across:
 - LMS (Bluechip ID creation)
 - Navitaire

2. Anomaly Detection & Exception Tracking

- Identify issues such as:
 - Missing ID mappings
 - Attribute inconsistencies
 - Duplicate identities
- Failed synchronization events
- Flag and monitor anomalies for review and resolution

3. Administrative Review & Resolution Utility

- Centralized operational utility/dashboard to:
- View anomalies and discrepancies
- Review synchronization failures
- Approve or trigger corrective actions where required

4. Automated Correction & Synchronization

- Apply predefined business and reconciliation rules to auto-resolve identified issues
- Update connected systems to maintain synchronized customer identity records

5. Retry & Reprocessing Capability

- Detect failed synchronization or update events
- Enable:
 - Automated retry processing
 - Manual re-trigger and reprocessing support

2. Commercial Engagement Model

The proposed engagement will follow a project-based implementation model, where Lagozon will deliver the identity reconciliation and synchronization solution through a structured implementation lifecycle including design, development, testing, deployment, and stabilization support. The engagement is structured to align with IndiGo's revised commercial and infrastructure expectations, with clear bifurcation between mandatory implementation services, optional infrastructure components, and optional managed support services. The proposed solution is designed to leverage existing IndiGo-managed infrastructure, enterprise platforms, and security controls wherever technically feasible. Any external hosting, third-party infrastructure, SaaS/PaaS services, or non-standard components, if required, shall be proposed separately and will remain subject to IndiGo architecture, InfoSec, and governance approvals. The engagement will involve close collaboration between Lagozon's implementation team and IndiGo's technology and business stakeholders to ensure alignment with enterprise integration standards, operational requirements, governance processes, and support transition expectations.

S. No.	Header	Cost in INR	Mandatory / Optional
1	License Subscription Cost	Provided by Indigo	Mandatory. We will use Infra provided by Indigo. No other licenses are required.
2	Implementation Cost (One Time)	61,50,000	Final price as on 11 July 2026
3	Infrastructure Cost – Development Environment		We will use Infra provided by Indigo
4	Infrastructure Cost – UAT / Pre-Prod Environment		We will use Infra provided by Indigo
5	Infrastructure Cost – Production Environment		We will use Infra provided by Indigo
6	Managed Support Cost (Post Warranty) – Monthly Cost	INR 1,59,775	Monthly Managed Support Cost post warranty is INR 1,59,775 Yearly Managed Support Cost is INR 19,17,300 AMS costs for considering 3 years TCO: 28 months (initial 6 months implementation, then 2 months free of cost warranty and then 28 months AMS - this makes 3 years total cost). Managed Support Cost post warranty over 28 months (3 years TCO) is INR 44,73, 700

			Post go-live, Lagozon will provide ongoing Application Management Services (AMS) for L2/L3 tickets raised by Indigo helpdesk. Lagozon will be covering L2 and L3 support provided by our shared services support team— including incident resolution, root-cause analysis, and configuration changes. Support will be delivered primarily from Lagozon's Delhi office, with resources deputed to the Customer's Gurugram location on a need basis where on-site presence is required, combining cost-efficient remote delivery with on-site flexibility based on issue criticality. There will be no changes made in any functionality of the deployed solution. Refer Technical proposal for coverage and details on AMS model
7	Warranty Support / KT Cost	0	2 months of warranty support and KT / transition assistance if needed and delivered during the warranty period are provided free of cost as part of the Implementation Cost
8	Any Other Cost (T&M / Additional Resources etc.)		Change Requests outside of scope of work will be submitted for Indigo team approval and billed as per the rate card provided in section 10 of commercial proposal.

3. Revised Implementation Commercials – Fixed Price Payment Milestones

The payment schedule for the engagement is structured based on defined project milestones and associated deliverables to ensure commercial transparency, delivery alignment, and milestone-driven execution.

The implementation commercials represent the mandatory implementation scope covering identity reconciliation, synchronization, utility development, testing, deployment, and stabilization activities as defined in the agreed project scope.

Milestone	Milestone Description	Percent	Amount (INR)
Milestone 1	Project Kick Off	10%	6,15,000
Milestone 2	Discovery Phase Sign Off	15%	9,22,500
Milestone 3	Design Sign Off	15%	9,22,500
Milestone 4	SIT Completion	20%	12,30,000
Milestone 5	UAT Readiness	20%	12,30,000
Milestone 6	2 months of Warranty Closure	20%	12,30,000
Total Implementation Cost		100%	61,50,000 (sixty one lacs and fifty thousand only)

4. Infrastructure & Environment Assumptions

The proposed solution is designed to align with IndiGo’s existing enterprise technology ecosystem, infrastructure standards, security controls, and hosting preferences wherever technically feasible.

The implementation approach assumes utilization of existing IndiGo-managed environments for Development, Testing, UAT, and Production activities, subject to infrastructure readiness, access provisioning, and enterprise approvals.

Infrastructure ownership, OS management, enterprise security controls, network governance, backup management, and hosting operations for IndiGo-managed environments are expected to remain under IndiGo or its designated infrastructure partners.

Any external dependencies, third-party platforms, licensed components, or enterprise-supported open-source technologies proposed as part of the solution shall be explicitly identified during the detailed solutioning phase.

5. Warranty Support

Lagozon shall provide warranty support for the implemented solution for a mutually agreed warranty period post Go-Live and production stabilization.

During the warranty period, Lagozon shall provide:

- defect resolution support,
- issue analysis and bug fixes,
- deployment assistance,
- configuration support,
- application stabilization support,
- and operational coordination required for successful transition into steady-state operations.

Warranty support shall only cover application-level support activities for the implemented solution components.

Infrastructure management activities including:

- server management,
- OS patching,
- enterprise security controls,
- network operations,
- and infrastructure monitoring

for IndiGo-managed environments are expected to remain under IndiGo or designated infrastructure partners.

Post warranty and stabilization, managed support services (if required) may be transitioned into a separately governed support engagement based on mutually agreed commercials and support scope.

Lagozon shall additionally support knowledge transfer, SOP handover, deployment documentation, and operational transition activities during the stabilization and support transition phase.

6. Managed Support Services Commercials

Post warranty and stabilization, Lagozon will provide optional managed support services for the implemented Identity Resolution and Customer 360 platform based on mutually agreed scope, tenure, SLAs, and commercials.

The managed support scope may include:

- Application monitoring and issue resolution
- API and integration support
- Identity reconciliation workflow support
- Deployment and release coordination
- Performance monitoring and optimization
- Periodic health checks, documentation updates, and transition support

Managed support services shall primarily cover application-level support responsibilities for the implemented platform components.

Infrastructure operations, OS management, enterprise security controls, backup management, hosting operations, and network administration for IndiGo-managed environments are expected to remain under IndiGo or its designated infrastructure partners.

IndiGo may choose to continue vendor-managed support, partially onboard internal support teams, or fully transition operational ownership internally post stabilization.

Any managed support services proposed by Lagozon shall be commercialized separately as an optional service component.

Below are the commercials for support services to be paid advance for one quarter:

Description	Support Duration	Amount (INR)
L2/L3 Managed Support Services	1 month	INR 1,59,775
L2/L3 Managed Support Services	12 months	INR 19,17,300

Payment Terms:

- Support services shall be agreed with having purchase order for at least 1 year basis for ensuring resource planning and will be billed on a month-end basis as per payment terms. These services will be delivered by shared L2 support services team at Lagozon Delhi HQ office.

7. Indicative Infrastructure & Environment Requirements

The below infrastructure estimate is provided as an indicative reference for infrastructure sizing and commercial planning aligned with the proposed solution architecture. Infrastructure provisioning, hosting approach, and environment strategy shall be finalized jointly with IndiGo based on enterprise standards, hosting preferences, and implementation requirements.

Service category	Service type	Region	Description
Web	API Management	Central India	API Management v2 Service, Basic Tier, 1 Base unit(s) x 730 Hours, 0 Scale out unit(s) x 730 Hours, 1,00,00,000 API requests per month
Analytics	Azure Data Factory	Central India	Azure Data Factory V2 Type, Data Pipeline Service Type, Self-hosted Integration Runtime: 0 Activity Run(s), 200 Data movement unit(s), 200 Pipeline activities, 0 Pipeline activities – External, Data Factory Operations: 50 x 50,000 Read/Write operation(s), 50 x 50,000 Monitoring operation(s)
Analytics	Azure Machine Learning	Central India	1 D4 v3 (4 Core(s), 16 GB RAM), 3 year reserved
Databases	Azure SQL Database	Central India	Single Database, vCore, General Purpose, Provisioned, Standard-series (Gen 5), Primary or Geo replica Disaster Recovery, Zone Redundant, 1 - 2 vCore instance(s), 3 year reserved, 1024 GB Storage, SQL License (Pay as you go), RA-GRS GB Storage, 1,048 GB Backup Storage, 8 x 250 GB Long Term Retention
Compute	App Service	Central India	Premium V2 Tier; 1 P2V2 (2 vCPU(s), 7 GB RAM, 250 GB Storage) x 730 Hours; Windows OS; 0 SNI SSL Connections; 0 IP SSL Connections; 0 Custom Domains; 0 Standard SLL Certificates; 0 Wildcard SSL Certificates
Internet of Things	Logic Apps	Central India	Workloads: Standard plan, 1 WS1 (1 vCores, 3.5 GB RAM) x 730 Hours, 0 Standard Connector Calls per day x 1 day, 0 Enterprise Connector Calls per day x 1 day; Integration Service Environment: Premium tier, 0 Base Units x 730 Hours, 0 Scale Units x 730 Hours; Integration Accounts: 0 Standard Integration Accounts x 730 Hours, 0 Basic Integration Accounts x 730 Hours.
DevOps	Azure Monitor	Central India	Log analytics: Log Data Ingestion: 2 GB Daily Auxiliary Logs without processing, 0 GB Daily Auxiliary Logs with processing, 2 GB Daily Basic logs, 0 GB Daily Analytics logs ingested, 1 months of Interactive Retention, 0 months of Retention, 0 GB data restored for 0 days, 0 queries per day

			with 0 GB data scanned per query, 0 GB of Log Data Exported per day, Platform Log Data Processed per day: 0 GB with Destination to Storage or Event Hub and 0 GB with Destination to Marketplace Partners, 0 Search job Queries per day with 0 GB data scanned per query; 0 SCOM MI Endpoints; Metrics: Using default collection estimation method 0 API calls, (with a cluster of 0 linux nodes, 0 Windows nodes, 0 containers, and 0 pods), 0 Average daily Dashboards users, 7 Dashboards, 50000 Data samples queried per dashboard, 25 promql alerting rules, 25 promql recording rules, 0 metrics datapoints exported; Application Insights: 1 GB Daily logs ingested, 3 months Data retention, 0 Standard Web Tests, 5 Minutes Execution frequency, Executing for 730 hours; 0 resources monitored X 1 metric time-series monitored per resource, 5 Minutes Log Signal frequency with 0 Log Alerts monitored and 1 time series per signal, 0 Additional events, 0 Additional emails, 0 Additional push notifications, 0 Additional web hooks (in millions)
Security	Key Vault	Central India	Vault: 10 operations, 0 advanced operations, 0 renewals, 0 protected keys, 0 advanced protected keys; Managed HSM Pools: 0 Standard B1 HSM Pool(s) x 730 Hours
Developer Tools	Azure DevOps	Central India	0 Basic Plan license additional users, 2 Basic + Test Plans license users, Free tier - 1 Microsoft Hosted Pipeline(s), 1 Self Hosted Pipeline(s), 5 GB Artifacts, GitHub Advanced security - 0 committers covered by code security and 0 committers covered by secrets protection
Networking	Azure Private Link	Central India	5 Endpoints X 730 Hours, 2048 GB Outbound data processed, 1048 GB Inbound data processed
Analytics	Microsoft Purview	Central India	Data Governance: 100 Assets x 31 days, 1 Basic data quality processing units, 1 Basic controls and reports processing units

8. KT & Transition Support

Lagozon shall provide knowledge transfer and transition support activities during the implementation and warranty period to support operational readiness and enable smooth handover, if required by IndiGo.

The scope may include:

- technical knowledge transfer sessions,
- deployment and operational walkthroughs,
- SOP and runbook handover,
- architecture and integration documentation,
- support process documentation,
- and coordination with IndiGo teams or designated support partners

In case IndiGo decides to transition support responsibilities to internal teams or other designated partners, Lagozon shall provide reasonable transition assistance and operational knowledge handover for the implemented solution during the warranty period. Efforts for KT/Transition outside the warranty duration would be charged at the provided resource rate card in section 10.

9. Change Request (CR) Commercials

Any effort beyond the included threshold of scope, or any CR involving:

- major functional enhancements,
- new integrations,
- infrastructure changes,
- additional environments,
- non-standard technology components,
- externally hosted services,
- security-driven modifications,
- or architecture-level changes

shall be evaluated separately and billed based on the applicable rate card and mutually agreed commercials.

All Change Requests shall follow the agreed governance, impact assessment, approval, and change management process jointly defined between IndiGo and Lagozon.

10. Rate Card for CRs

S. No.	Skill Category	INR Price Per Man Day	INR Price Per Man Month
1	Solution Architect	INR 23,000	INR 4,40,000
2	Cloud Engineer	Blended Rate: INR 15000 (fifteen thousand) per man-day	Blended Rate: INR 300000 (three lacs) per man-month
3	Data Engineer		
4	Data Engineer		
5	AI Engineer		
6	App Engineer		
7	DevOps / Git		
8	QA		
9	Project Manager		
10	Business Analyst		

IndiGo shall be billed based on actual effort utilization, approved scope, and applicable resource engagement as per the agreed rate card. Invoices for CR activities may be raised based on mutually agreed milestones, effort utilization, or completion of the approved CR scope. Change management process is described in submitted proposal - [Technical Proposal Reference Number: LTPL/03/25001 \(version 1.1 dated 18 Mar 2026\)](#)

11. Assumptions & Dependencies

- Required access, APIs, enterprise environments, and connectivity dependencies shall be provisioned by IndiGo in alignment with the agreed implementation timelines.
- The proposed commercials are based on the current scope, integration landscape, and requirements shared by IndiGo during the proposal stage.
- Any new integrations, major changes, additional environments, or non-standard requirements identified during implementation shall be handled through mutually agreed Change Requests (CRs).
- Existing IndiGo-managed infrastructure, hosting environments, and enterprise security controls are expected to be leveraged wherever technically feasible.
- Any vendor-hosted infrastructure, external SaaS/PaaS services, or third-party licensed components, if required, shall be proposed separately and remain subject to IndiGo approvals.
- Application-level support responsibilities shall be handled by Lagozon, while infrastructure, OS, network, and enterprise hosting operations for IndiGo-managed environments are expected to remain under IndiGo or designated infrastructure partners.
- Knowledge transfer, operational handover, and transition activities shall be executed jointly during stabilization and support transition phases.

STANDARD TERMS & CONDITIONS

1. Applicable taxes are additional and will be applied as per the latest government policy.
2. **Proposal Agreement to be signed by both parties which can be served as Purchase Order.**
3. If PO raised, then PO to be released in favor of:
 - Lagozon Technologies Pvt. Ltd.
 - PANs: AACCL3013D
 - GSTIN: 06AACCL3013D1Z8
 - Contact Person: **Yash Nagpal**
 - Address of branch office: 1F/2A, N.I.T. FARIDABAD, HARYANA 121001
 - Email: yash@lagozon.com
4. Payment Term is NET45 (45 Days).
5. Consultants will work on the working days excluding weekends (Saturday and Sunday).
6. Consultants will follow customer's public holiday calendar.
7. At any customer, the site location outside Delhi NCR - Travel, Food and Accommodation - is to be provided by the customer during the tenure of the consultants.
8. Any products or services not mentioned in this proposal are deemed out-of-scope and such products or services will not be delivered by Lagozon Technologies.
9. The validity of the above prices is till **20 July 2026**.
10. **PO Address:** Any Order for availing our services pursuant to the said Proposal is to be placed on Lagozon Technologies and shall become binding on both Parties upon written acceptance by Lagozon Technologies. The terms and conditions of this offer shall override any conflict in the customer's order unless agreed to by Lagozon Technologies in writing.
11. **Warranty:** Except as expressly set forth in the said Proposal, Lagozon Technologies makes no other warranty to the customer, any person or entity or any kind, express or implied, including, without limitation, any conditions of quality and any implied warranty of title, non- infringement, merchantability or fitness for a particular purpose.
12. **Data Availability:** The Customer shall provide all necessary information, documents and data for the execution of the work. This information may include IT asset lists, Application Usage patterns, Office addresses & contact information, third party Vendor contact information. Non-availability of the information may lead to interruption of the work.
13. **Force Majeure:** Lagozon Technologies will not be responsible for interruptions and / or delays or stoppage of work due to acts of God, Government, Lockdown, statutory authority, violence, strikes, civil commotion, war, floods, or other causes of force majeure, which may affect the execution of the Project.
14. **Confidentiality:** Each Party will maintain the confidentiality of any information provided by the other Party under the said offer and during project execution.
15. **Utilization of Resources:** Services of Lagozon Technologies' employees deployed for the project may be utilized only for the tasks related to the work defined in this Proposal and / or the scope of work mutually agreed in writing, and not otherwise. Team will work for 5 days in a week, with weekends off.
16. **Limitation of Liability:** In no event shall Lagozon Technologies be liable to the Customer, whether in contract or tort or under any other legal or equitable theory (including strict liability) for any indirect, incidental, exemplary, punitive, special or consequential damages, including without limitation, personal injury or loss of business, profit, revenue, data, or programs, loss of work product or any and all other commercial damages or losses, even if the

Lagozon Technologies has been advised of the possibility of such damages. Notwithstanding anything to the contrary, mentioned elsewhere, Lagozon Technologies' total liability shall be limited to the value of money received in respect of services rendered under the order-giving rise to a claim by the customer.

17. Work Rules: Customer shall inform the rules, regulations, security policies & code of conduct to be observed by Lagozon Technologies personnel during the execution of the project at customer's site.

18. Final Terms: These terms and conditions form an integral part of the commercial or priced offer of Lagozon Technologies for the provision of Lagozon Technologies' services. These terms and conditions supersede all prior representations, warranties and agreements, written or oral unless otherwise agreed to in writing by Lagozon Technologies.

19. Non-Payment: In case of non-payment of invoices for a period of 15 days beyond the due date, Lagozon Technologies is free to exercise the right to temporarily halt the work being done by its consultants till the outstanding payments are received in full.

20. Governing Laws: The laws of India shall govern this Proposal and the resulting contract. The parties submit themselves to the exclusive jurisdiction of the courts at Faridabad, Haryana (India) in respect of a dispute arising out of or in any way connected with this Proposal and / or the resulting contract.

21. Document confidentiality: Customer should maintain confidentiality of the proposal submitted and should not disclose any or part of the information to other vendors under any circumstances.

22. Deliverables: As covered in the methodology section of the proposal

23. Termination: Either party can terminate this Agreement by providing a written notice of 30 days to the other party and clearing the dues bases on agreement.

24. Price Revision: Considering market conditions, resource retention and increments; the T & M price would undergo revision after completion of 1 year of the engagement.

25. Non- Solicitation: As a strict and sacrosanct corporate policy, all Lagozon Technologies employees, consultants, and contractors are bound by enforceable Non-Disclosure Agreements (NDAs), non-solicitation obligations, and other contractual confidentiality commitments, with violations subject to strict disciplinary and legal action. Lagozon Technologies expressly prohibits its personnel from accepting employment or engagement, directly or indirectly, with any current or prospective customer of Lagozon, including through third-party vendors or affiliates. Further, Lagozon Technologies shall not directly or indirectly solicit, hire, engage, or attempt to engage any employee, consultant, contractor of its customer associated with or exposed to the current project, whether independently or through any third party.

COMPLETE AGREEMENT

This proposal constitutes the entire agreement of the Parties with respect to its subject matter and may not be modified in any way except by written agreement signed by the parties. In the event of any conflict, the terms and conditions of this proposal agreement shall control. There are no other agreements either express or implied with regard to this subject matter.

IN WITNESS WHEREOF, the parties hereto have agreed to proposal terms and conditions as on effective date of _____
